Type of loans	100% residential Norwegian mortgages
Type of mortgages	Flexible: 48,75 % Repayment: 51,25 %
Rate type	Float 94%, Fixed 6%
Geographic distribution	Across Norway with a concentration to Rogaland
Weighted average LTV	46 %
Weighted average seasoning	4,36 years

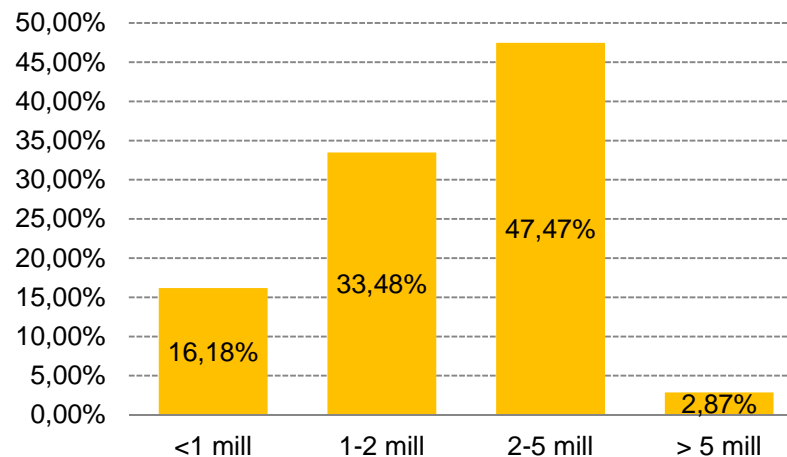

Pool notional

Volume

Loan distribution

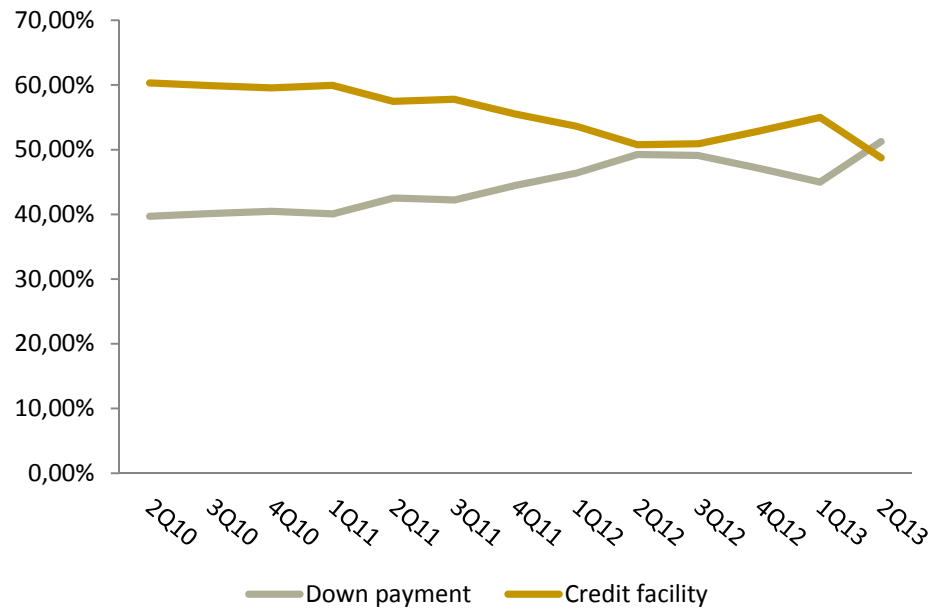

- Total cover pool size: MNOK 6,462
- Stable volumes due to implemented disposal limits in Sandnes Sparebank:
Maximum of:
 - 45 % of the Groups retail loans or
 - 30 % of the Groups total loan portfolio
- 185 MNOK in bucket > 5 mNOK
- Expect that loans above 5 MNOK will increase slightly as property prices continue to rise.

Type of mortgages

Portfolio by loantype

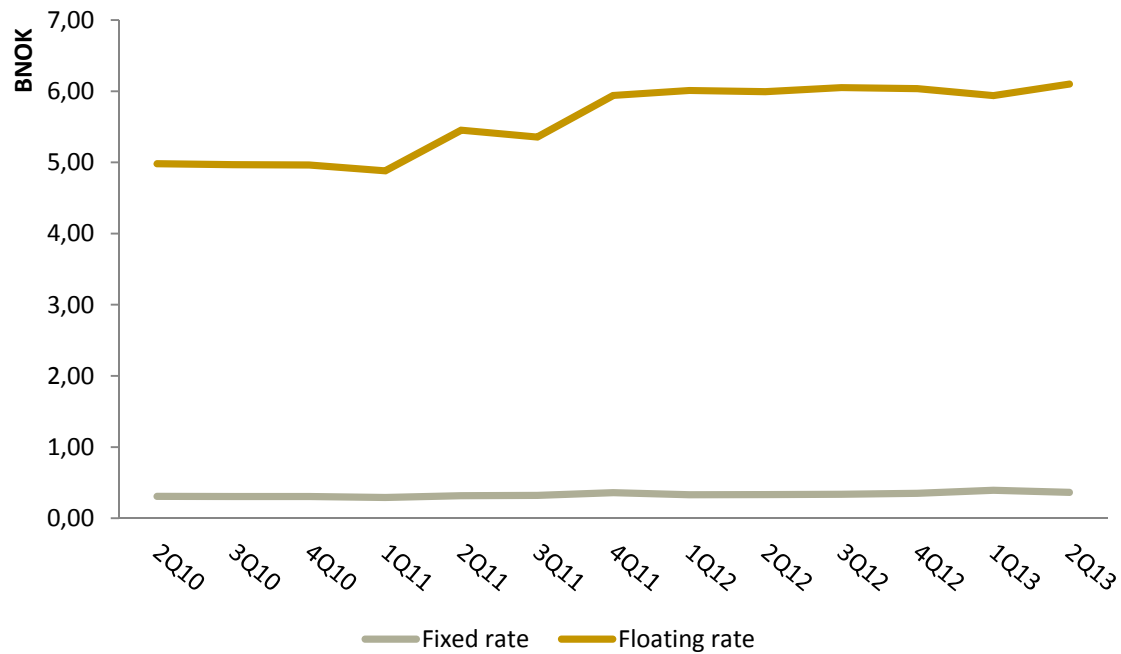

- High concentration of Credit Facilities due to volume focus in period 2003-2008.
- Low volumes in granted Credit Facilities since 2009 due to:
 - More restrictive credit policy.
 - Implementation of price differences between down payment loans and credit facilities (min 15 bp)
 - New regulations from the Norwegian FSA say that banks only can grant Credit Facilities to customers with LTV within 70 %.

Type of mortgages

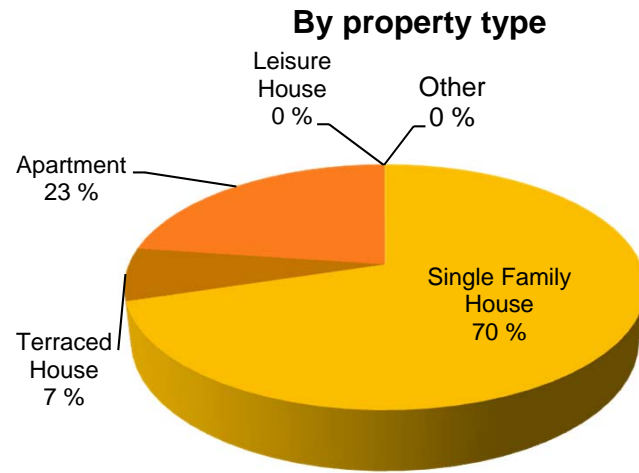

Loan distribution by type

- ° Low level of fixed rate loans.
- ° Expect no significant change in level as swaps are on low levels, but margins have increased.

Distribution of the Cover Pool

Conservative and High Quality Pool

Current LTV (by Amounts)

- Weighted average LTV: 46%
- Approx 73% of the cover pool has an LTV < 60%

Seasoning

- Weighted average seasoning: 4,36 years
- Approx 63 % of the cover pool is > 3 year seasoned

Conservative and High Quality Pool

Loan to Value

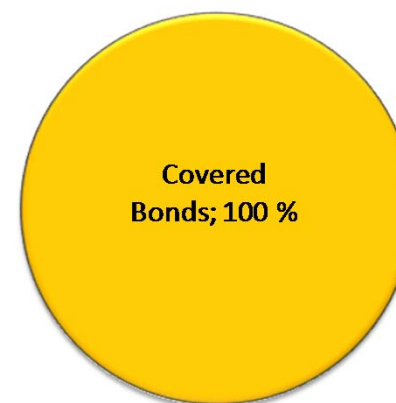

- ° Minor increase due to change of value applied from Eiendomsverdi
 - ° From market value to adjusted value
- ° Expect the stable trend to continue due to:
 - ° Population growth
 - ° Local investments and labor market
 - ° Residential property market
 - ° Payment moral
 - ° Turnover in local housing market is higher than the national market

Conservative and High Quality Pool

- OC level is set to minimum 10 % by the Board of Directors
- Substitute assets can consist of the following exposures to financial institutions:
 - Deposits with a maturity of less than 100 days and a minimum rating of A-.
 - Other investments with a minimum rating of AA-.

Conservative and High Quality Pool

- Very low level of impaired loans in the mortgage portfolio
- Agreement towards Sandnes Sparebank was modified in 2012.
 - Non performing loans will be transferred back to Sandnes Sparebank
 - A loan is regarded as non-performing or in default when the customer has failed to pay an installment within 90 days of the due date, or when an overdraft of a credit of line has not been covered within 90 days after being overdrawn.
 - The non-performing loan will be subject to individual valuation at the time of transfer.
 - Non performing loans per 30.06.2013 is 0.
